Spinnaker is the most innovative Advanced Traffic Management System (ATMS) in the industry with an integration platform for multiple sub-systems. It is viewable through different operating and computing devices such as Windows, OSX, Android, iOS and Linux.

Description

Efficiently managing current and future traffic requires a solution that will deliver immediate benefits and is designed with the flexibility to help you achieve your immediate and long-term goals. Spinnaker is a true web based, user friendly, intuitive, scalable and effective Advanced Traffic Management System (ATMS).

The Navigator, Explorer and Reporter modules are packed with features. Seamless scrolling and zooming of map displays, easy intersection configuration, device filtering, alarms, field device connection for monitoring and status, standard and customized reporting on all data to name a few.
